

## ROBOTIC WALL SCRUBBER CLEANER

## ROBOTIC WALL SCRUBBER CLEANER

### TECHNICAL SPECIFICATIONS

Maximum pool size	9m x 12m x 2.6m depth
Pool types	In ground pools
Pool shapes	All shapes
Motors	2 x drive motors + 1 x pump motor
Automatic shut off	3 hours
Cable	18m kink-resistant cable
Weight	4.5kg w/out transformer
Submerged weight	20kg
Filter volume	8.1 litres

### ELECTRICAL SPECIFICATIONS

Volts	24 volts DC
Watts	120 watts
Amps	5.22 amps

### DIMENSIONS

Length	420mm
Width	420mm
Height	240mm

### warranty

Nitro Robotic Pool Wall Scrubbers are covered by a 2 Year warranty. Nitro wheels and Gel-pro brushes are excluded from warranty.

# ROBOTIC WALL SCRUBBER CLEANER

## THE NEXT GENERATION

Nitro Robotic Wall Scrubber Pool Cleaners represents the next generation of pool cleaners. Independent to your pool's pump and filter system, Nitro Wall Scrubber Pool Cleaners are self-driven by three internal motors.

Replicating your pool's filtration system, Nitro Wall Scrubber Pool Cleaners vacuum in water, dirt and debris via an internal pump and filters the water via its filtration system.

No installation, hoses or additional equipment is required, just turn it on and it will vacuum, scrub and clean your pool's floor and walls up to the water line in 3 hours. Nitro Wall Scrubber Pool Cleaners are suitable for vinyl liner, fibreglass, tile and concrete residential pools up to 9m x 12m.

## RELEASE YOUR POOL SKIMMER

Without a suction cleaner attached to your pool skimmer, it is left free to skim the top of your pool. Removing restrictions on your pool skimmer also increases the pool's turnover rate, improving water clarity.

## ALL TERRAIN TRACTION PLUS GEL-PRO BRUSHES

Nitro's Wall Scrubber has two sets of continuous traction wheels to enhance its climbing performance. Its dual Gel-pro brushes are gentle enough for vinyl liners, yet rugged enough to clean the dirtiest concrete and fibreglass pools.

## WIDE CLEANING PATH

The strategic location of its vacuum intake ports and the advanced geometry of its under belly allows debris to be vacuumed not only from under the cleaner, but also from its sides.

## DUAL DIRECT DRIVE MOTORS

Nitro Wall Scrubber's front and rear Gel-pro brushes are both powered by the cleaner's direct drive motors with increased torque and efficiency. Its Dual Direct Drive motors allow for powerful scrubbing, pin point navigation, better traction and superior climbing capabilities.

DUAL DIRECT DRIVE MOTORS

## LARGE INTAKE PORTS

Nitro Wall Scrubber's extra large vacuum intake ports are placed directly behind both its cleaning brushes, enabling the vacuuming of large leaves and debris.

## SCRUBS THE POOL FLOOR, WALLS AND STEPS

Nitro Wall Scrubber not only cleans your pool's floor, it also climbs and scrubs your pools steps and walls up to the water line.

## EXTRA LARGE CAPACITY FILTER BAG

Nitro Wall Scrubber's extra large filter bag is designed to maximise its capacity and micro filters down to the finest debris.

## QUICK-DRAIN SYSTEM FOR EASY LIFT

Nitro Wall Scrubber's quick-drain system allows water to rapidly flow back into the pool, immediately lightening the cleaner for quick and easy removal from the pool.

## SAVE TIME, WATER AND CHEMICALS

Nitro Wall Scrubber micro filters and circulates the pool water reducing filter maintenance, saving water and pool chemicals.

## ENERGY SAVING

Nitro Wall Scrubber's water-cooled pump motor represents the latest in green technology. Nitro Wall Scrubbers operate on only 120 watts of power, reducing energy consumption by 90% in comparison to pressure pool cleaners.

## INTELLIGENT NAVIGATION

Nitro Wall Scrubber's navigation system prevents the cleaner from getting caught on any obstacles. Plus its intelligent programming sends the cleaner in a different direction every time, improving pool coverage.

CADDY INCLUDED  
Convenient storage and transport.
